

# Budget Friendly Pool Remodeling Ideas

November 2016 by Scott Heusser

Just like your home, your pool or spa gets to the point that you may be a little disappointed in its appearance. It could be that you adopted the pool when you bought the home. Or, the tile might be dirty or showing that it was in style with bell bottom jeans, the first time around.

Regardless of the reason, there is always a budget to stick to. I've listed out a couple ways to make some big differences in appearance and operation. Some of these can actually save you money by implementing new technology.

**LED Lighting.** We've all see the LED streetlights, light bulbs for our home and even in the taillights of cars in front of us. Did you know switching to an LED pool light can save 90% of electricity consumed by your lights? Add the color changing capability and you make a huge statement in your backyard!

**Solar Heat.** Do you cringe every spring thinking about the cost of the gas heater to get your pool up to temperature? Older heaters especially are likely only 75% efficient which means a quarter of the heat goes out the exhaust flue and not into the pool. Solar relies on the free heat from the sun to warm your pool.

**Variable Speed Pumps.** Other than you're a/c, a pool pump is the largest energy consumer in your home. Unlike traditional pool pumps that run flat out, a variable speed pump can be adjusted to the proper flow by reducing the RPM of the pump. Just like saving fuel in your car, take it easy on the accelerator.

**Refinishing.** Granted, this isn't inexpensive, but, refinishing with ecoFinish© AquaBright is a game changer. Unlike traditional finishes, water chemistry isn't a problem. Toss in the 10 Year manufacturer's warranty and that backyard becomes a treat, not a chore.

**Water Features.** Deck jets, scuppers, water bowls and water falls all add sound, motion and interest to you pool and backyard. Not to mention, they are a lot of fun for dogs and kids to play with!

Lets make your pool fun again. Entertaining friends and family shouldn't be a chore, it is supposed to be fun and relaxing. Let's chat and figure out how Idaho Pool Remodeling can "Make Your Pool Fun Again".

Spring remodel slots fill up quickly so please schedule a time soon to discuss your project!
